

The E.O. Wilson Biophilia Center (4956 State Highway 20 East, Freeport, FL 32439) will open its doors exclusively to IDIDAHIKE participants — free of charge when you present your bracelet ID! Explore the wonders of nature, learn about local wildlife, and discover the incredible biodiversity that thrives within the 55,000-acre Nokuse Conservancy.

During the open house, enjoy an inspiring presentation by guest speaker Charli Morgan, who will share engaging stories and practical tips drawn from years of experience in conservation and outdoor exploration. Founded in 2009 by M.C. Davis, a dedicated Walton County conservationist, and named in honor of world-renowned scientist Dr. Edward O. Wilson, the Biophilia Center continues to celebrate the deep connection between people and the natural world.

CHARLI MORGAN

Wildlife Biologist

Charli Morgan is a wildlife biologist at Nokuse Land Conservancy located in Walton county FL. A lifelong advocate of conservation and biodiversity preservation, Charli spent her early years exploring the fauna of upstate New York where she got her degree in Biology and Philosophy. Since arriving at Nokuse, Charli has gained valuable experience in the many facets of running a conservation and restoration operation of this scale. Her work has included close involvement in the gopher tortoise relocation program, avian monitoring, managing GIS tasks, and contributing to the design of projects. Her goal is to further assess the community structure of birds at Nokuse by integrating Motus and long term monitoring.
