

Hurricane Milton & Helene Impact Overview

Disclaimer: This map is only meant as a summary of hurricane impacts to the Florida National Scenic Trail and does not include damage to regions or conservation areas outside of the trail corridor. FTA crews are continuing to conduct maintenance and trail restoration work, and many of these areas are forecast to re-open in the coming weeks.

Please contact the land managers in question directly for concerns you may have. Please also see FTA's [Notice to Hikers](#) webpage for the most update-to-date information regarding trail reroutes or closure. Thank you for continuing to respect closures and ensuring we can complete this work safely and in consultation with local land managers.
